

# Visitation and Companion Policy

## During respiratory illness season

To reduce the spread of respiratory illness, we are taking the following precautions to protect our patients and colleagues.

**During this time, we ask that you limit companion visitors and attend your appointment alone.**

### **Permitted Exceptions for Companions**

- One companion for a minor patient
- One companion for a patient with an impairment warranting assistance
- One companion (over the age of 16) for pregnant mothers

### **Pre-Screening**

All visitors will be pre-screened (using standard questions and procedures) and may be required to wear a mask. Identification will be provided indicating a visitor has been pre-screened.

### **Symptomatic Individuals**

Individuals with respiratory symptoms or other risk factors for COVID-19, such as travel or exposure, should refrain from visiting.
